Summary

Computer Science Engineering student with strong foundations in **Data Structures & Algorithms, Object-Oriented Programming, Operating Systems and DBMS**. Experienced in designing and building scalable software systems, REST APIs, asynchronous processing pipelines, and event-driven architectures using **C++, TypeScript, JavaScript, Python, and SQL**. Built AI-powered and production-oriented systems with emphasis on reliability, performance, observability, and scalable architecture. Solved **450+ DSA problems**.

Education

Pranveer Singh Institute of Technology — Kanpur, Uttar Pradesh
B.Tech in Computer Science & Engineering ***CGPA: 8.08/10.0*** — *2024 - 2028*

Puranchandra Vidyaniketan — Kanpur, Uttar Pradesh
Class XII (CBSE) ***78.6%*** — *2023*

Acme Public School — Kanpur, Uttar Pradesh
Class X (ICSE) ***85.8%*** — *2021*

Technical Skills

Languages: C++, JavaScript, TypeScript, Python, SQL, C
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, D3.js
Backend: Node.js, Express.js, REST APIs, Prisma ORM, NextAuth
Databases: PostgreSQL, MongoDB, MySQL, Redis
DevOps & Tools: Docker, Git, GitHub, BullMQ, Grafana, Prometheus, Loki, Firebase, VS Code
Core CS: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks, System Design

Projects

IR Assist – AI-Powered Incident Response Platform | *Next.js, React.js, TypeScript, Prisma, PostgreSQL, Redis, BullMQ, Gemini API, Grafana, Prometheus, Loki, Docker, Vercel* | **GitHub** | **Live Demo** Jun 2026 – Jul 2026

- **Architected** a multi-tenant SaaS platform with secure **RBAC, authentication, and organization-level data isolation**, supporting reliable incident management workflows.
- **Engineered** scalable **REST APIs, event-driven background processing, and asynchronous jobs** using Redis and BullMQ, with AI-assisted root cause analysis for automated **incident investigation and remediation**.
- **Implemented** production-oriented **observability** using Grafana, Prometheus, and Loki, enabling real-time monitoring, audit logging, and incident tracking.

YouTube Video Summarizer | *React.js, TypeScript, Gemini API, Netlify* | **GitHub** | **Live Demo** Dec 2025

- **Built** an AI-powered video summarization platform leveraging **Google Gemini LLMs** to generate concise, context-aware summaries from YouTube videos.
- **Integrated** Google Gemini API with **asynchronous request handling**, reducing manual information retrieval time by **80%**.
- **Implemented** persistent state management, timestamp navigation, and one-click export for an improved user experience.

Algorithm Visualizer | *React.js, TypeScript, D3.js, Netlify* | **GitHub** | **Live Demo** Oct 2025 – Nov 2025

- **Developed** an interactive visualization engine for **Dijkstra's** and **A*** algorithms, improving algorithm comprehension for **200+ users**.
- **Implemented** responsive, cross-browser compatible graph visualizations for real-time shortest-path algorithm exploration.

Achievements

- **Oracle University:** Oracle Certified Foundations Associate — Agentic AI Certified Foundations Associate. — Sep 2026
- **LeetCode: Contest Rating 1738 (Top 11.5%); solved 400+ DSA problems across diverse topics.**
- **International Mathematics Championship 2022:** Secured **Global Rank 94** among **750+** Grade XII participants from **20+ countries**; awarded **Certificate of Merit (Bronze)**.

Leadership & Extracurricular Activities

- **Project Leader — College Expo:** Led a student team to develop a technical prototype, coordinating tasks, planning, and presentation.
- **Event Coordinator — Algo Club:** Organized competitive programming contests and workshops for **100+ students**, managing platform setup and execution.
- **Creative Team Member — Algo Club:** Designed technical content, coding challenges, and digital assets for competitive programming.
